Overview

Project-Swapa is a powerful platform designed to revolutionize resource sharing, enabling users to exchange items and services effortlessly while fostering a collaborative community.

Why Project-Swapa?

This project promotes sustainability and collaboration through a community-driven approach to resource management. The core features include:

-  **Resource Sharing:** Seamlessly exchange items and services, enhancing community collaboration.
-  **User-Friendly Interface:** Intuitive design ensures accessibility and engagement for all users.
-  **Transaction Tracking:** Maintain transparency and trust with comprehensive records of exchanges.
-  **Dynamic Interactivity:** Engaging animations and smooth transitions create a polished user experience.
-  **Skill Trading:** Empower professional growth by facilitating skill exchanges among users.
-  **Community-Driven Approach:** Connect and collaborate with others, fostering a supportive environment.

Getting Started

Prerequisites

This project requires the following dependencies:

- **Programming Language:** HTML

Installation

Build Project-Swapa from the source and install dependencies:

1. Clone the repository:

```
> git clone https://github.com/abderrahmane-bn/Project-Swapa
```

2. Navigate to the project directory:

```
> cd Project-Swapa
```

3. Install the dependencies:

echo 'INSERT-INSTALL-COMMAND-HERE'

Usage

Run the project with:

echo 'INSERT-RUN-COMMAND-HERE'

Testing

Project-swapa uses the **{test_framework}** test framework. Run the test suite with:

echo 'INSERT-TEST-COMMAND-HERE'
